

Zebra Mobility DNA Wireless Insights

Zebra Mobility DNA Wireless Insights is an integral part of IT infrastructure monitoring solutions from Aruba, Mist and Extreme, enabling instant visibility into an entire device network infrastructure. This reduces disruptions that impact business and supports higher application adoption across your organization, helping lower operational costs and increase ROI.

IT admins provide better user experiences and peace of mind

Visibility at the Edge

See data from the mobile device and across the entire infrastructure to monitor and circumvent issues

Real-Time Roaming Performance Analysis

Visibility into roaming events and data points for inbound and outbound roaming behaviors

Live Voice Quality

Combines roaming analysis data with test results from simulated and live voice analysis

Live Analysis

A real-time holistic view in a single dashboard of your entire network

CIOs deliver reduced business disruption and increase application adoption
