Release Notes – TekTerm 9.2

Contents

Description

The following changes and fixes have been included in this CFE:

SPR NO	Synopsis
37293	Fixed – following an SSH host session closed (Georgia Softworks), the TekTerm session colours were black text on a black background (as set by the host). Prompts were no longer readable. This release restores TekTerm colour defaults after a session closes, so text is now visible (black text on a white background).
