

Enterprise Keyboard Designer 1.9

Release Notes – July, 2020

Highlights

- New Undo feature reverses each of the last 10 layout design actions
- Deploy button exports the custom key-layout definition file to a USB-connected device
- Supports creation of repeating keys, to send multiple keycodes as long as the device key is held down
- Supports Macros to combine multiple keycodes, presses or actions into a single action
- Now includes [predeveloped key layouts](#) that can be downloaded and deployed immediately or customized to suit the needs of an enterprise.

Device Support

- EKD runs on Windows 8 or 10
- Layouts created with EKD 1.9 can be rendered on these [Zebra devices supported by EKB v3.9](#)
(or later)

New in Enterprise Keyboard Designer 1.9

About Enterprise Keyboard Designer

Enterprise Keyboard Designer is a free desktop tool for Windows that employs a drag-and-drop interface for quickly creating customized device keyboard layouts for use on Zebra Android devices. As many as 20 custom keyboard layouts can be created and deployed to devices to address specific input requirements and extend Zebra's Enterprise Keyboard, which is required to use the layouts. Layouts are stored in a single, encrypted file for easy, secure deployment.

Enterprise Keyboard Designer (EKD) offers control over all attributes, including layout size, position, background color, transparency, font size, images and many other properties. Available from the Zebra Support Portal, EKD installs quickly from a single download package on desktops and laptops running Windows 7, 8 and 10.
