

APPLAUNCHER VERSION 1.7 RELEASE NOTES

INTRODUCTION

AppLauncher provides a convenient mechanism for launching applications on a mobile device. It can also be used to restrict access to the Operating System shell. AppLauncher is fully configurable via the registry and allows applications to be categorized into program groups. This allows the user to hierarchically organize applications according to their functionality and business need. AppLauncher can be used with the keyboard as well as the touch screen, providing support for both touch and nontouch devices. AppLauncher's look and feel can be configured according to the users preferences allowing it to be customized with corporate branding.

WHAT'S NEW

1. Rebranded as Symbol Technologies LLC.
 - Configuration registry path changed as SymbolLLC.
 - Default banner updated with Zebra logo.
 - User guide updated with the Zebra copyright message, name and logo.
 - Installation updated with the Zebra EULA.
 - Version information of all binaries modified to include Zebra copyright message.
