Bisphenol S in Thermal Materials

Zebra Technologies recognizes the importance of understanding its environmental responsibilities and complying with applicable laws and regulations to minimize adverse effects on human health and the environment.

On December 29, 2023, the California Office of Environmental Health Hazard Assessment (OEHHA) added bisphenol S (BPS) to the Proposition 65 list of chemicals, classifying it as a reproductive toxicant. BPS is used as a reactive agent commonly found in thermal paper. All Zebra products that contain BPS (listed below) are safe to use as intended and are not to be ingested.

All Zebra products are BPA free and have been since November 2019
