

SP72 SERIES

Product Environmental Attributes

Putting Sustainability at the Heart of Our Products

When it comes to creating sustainable products, Zebra is committed. From company-wide global initiatives to the end-to-end product life cycle from manufacturing to retirement, our green initiatives protect the planet — and the people who make and use our products.

ZEBRA
CAPTURE
YOUR EDGE

A-to-Z sustainable packaging

Our packaging is sustainable:

- Biodegradable outer packaging
- Electronic Product Reference Guide

Eco-friendly attributes¹

- No halogens
- No mercury
- No PFO/PFOAs
- No latex
- Compliant with global RoHS requirements

Power consumption

Power saving features in the SP72 Series help you save money, reduce your operational costs and increase your green score.

- Intelligent Illumination System activates only when an item is in the scan zone, reducing power consumption over competitive imagers
- Operates from 5V USB, eliminating the need for an external power supply²
- Zebra Technologies external power supplies meet US Department of Energy (DoE) Level VI and all international efficiency requirements

Lower consumption of devices and accessories through maximized life cycles

Most carbon emissions occur during mining and manufacturing — the fewer devices you use, the more you reduce greenhouse gases.

- Designed to withstand harsh customer environments with a targeted <0.5% failure rate
- Keep your devices current and seamlessly scale with ongoing enhancements delivered quarterly via the Zebra Evolution Update
- Up to 5 years of repair and service: no need to retire working devices due to lack of available support³
- Universal cables and power supplies are compatible with past and future device generations
- The SP72 Series' solid state technology means less wear and tear, minimizing breakdown and repair costs
- By troubleshooting remotely, you can greatly reduce your onsite service visits. Access diagnostic data in real time, such as confirming device operation and ensuring correct configuration, and more — all from your remote management console

Designed for recyclability

- Common fasteners and snap-in features
- Maximize recycling and protect the quality of the recaptured and recycled components
- Zebra offers free recycling of your end of life devices, complete with a certificate of destruction upon request

Offer a faster, more convenient checkout experience with the SP72 Series Single-Plane Scanner.

Available in both horizontal and vertical models, the high-performance SP72 Series is ideal for high-throughput self-checkout (SCO) and cashier-manned checkout lanes in grocery, convenience, pharmacy and specialty stores. When you choose the SP72 Series, you can be confident that it's the right choice for your customers, the environment and your bottom line.

1. All electronic products from Zebra may contain trace amounts of other chemicals on the IEC 62474 list of hazardous substances. 2. Use of a color camera and/or aux scanner requires more than 500mA which can be achieved via a high-power USB port (i.e. USB BC1.2), 12VDC PowerPlus cable, or external power supply if desired. 3. Begins after last ship date. Must be within warranty or under service contract.
