Ensure patient safety with Zebra's comfortable, proven wristbands

ID Wristbands that fail to scan can impact patient safety and the ability to provide timely patient care. That's why a majority of hospitals are choosing Zebra® thermal or laser hospital wristbands—proven to improve patient ID accuracy and operational efficiency point-of-care services. More than 382.8M patients globally were identified by Zebra patient wristbands in 2018. As a leader in patient ID wristbands, Zebra is proud to offer you the widest range of the most durable and simple-to-use direct-print laser and thermal wristbands.

Improved patient identification. The durability of Zebra's laser and thermal wristbands greatly reduces instances of unscannable wristbands. That ensures validated medication administration and procedures, as well as accurate sample identification.

Reduced nursing workarounds. Zebra laser and thermal wristband durability also greatly reduces occurrences of unscannable wristbands. Fewer unscannable wristbands means hospitals can use system-validated patient care and limit the need for nursing workarounds.

One-stop shop for all patient identification needs. Different hospital departments may have different patient identification needs and may want to implement laser in some areas and thermal in others. With Zebra's broad product portfolio, we have a solution, not only for the general patient population, but neo-natal, labor and delivery and outpatient services, while supporting your need to identify special patient conditions.

Patient ID solution expertise. As the manufacturer of not only wristbands but also thermal printers, barcode scanners and mobile computers, Zebra understands hospitals' patient ID needs and offers them a comprehensive patient ID solution.

Z-Band Thermal Wristbands

Zebra's Z-Band Wristbands are one of the most durable wristbands

A barcode that fails to scan or requires repeated attempts to scan jeopardizes patient safety and staff productivity. Zebra's supplies research and development team has worked with our coatings suppliers to develop a wristband that stands up to not only moisture but also a wide array of hand sanitizers to ensure optimum image durability and scanning performance.

Zebra's Z-Band® direct thermal wristbands:

- Feature a silver antimicrobial coating that protects the wristband
- Enable staff to quickly and easily print and securely fasten in less than a minute, using an adhesive tab or color clip
- Are made of polypropylene
- Are latex-free
- Use direct thermal imaging chemistry composed primarily of leuco dyes and developers; use only UV varnishes and water-based inks; and contain zero metal content, which allows them to be considered MR-safe.

For more details on the durability testing performed, please download our white paper on www.zebra.com titled "Laboratory Testing of Zebra's Z-Band Direct Thermal Antimicrobial Wristbands."

Compatible with HC100 & ZD510-HC

The ZD510-HC and HC100 are the easiest wristband printers to use on the market. Just insert the wristband cartridge containing Zebra Z-Band® wristbands and print. The smartchip in each cartridge allows automatic calibration. The ZD510-HC and HC100 instantly identifies the wristband size and automatically configures darkness and speed settings for optimal print quality and wristband durability. The result? No wasted wristbands. Support calls for wristband loading issues are virtually eliminated, and admissions personnel can focus on the patient, not printing wristbands.

Z-Band Fusion

Zebra's self-laminating Z-Band Fusion® direct thermal polypropylene wristband is perfect for use at specialized hospitals where the average patient stay exceeds 14 days.

The advanced shape and design makes assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning, while providing superior patient comfort.

Features Include

- Self-laminating design protects the printed text and barcodes
- Adhesive-closure
- Wristband extender to fit a wide range of wrist sizes
- Available in Adult, Pediatric, and Infant sizes
- Includes Patient Chart Label
- Durable for an extended time
- Latex-free

Z-Band Fusion Specifications

Z-Band Fusion wristbands are available in a wide offering of sizes to meet the needs of most patients.

LaserBand Laser Wristbands & Labels

LaserBand Wristband

Zebra's self-laminating LaserBand® direct-print laser wristbands enable wristband and label printing on one sheet utilizing existing laser printers.

- Self-laminating seal protects the wristband from moisture and hand sanitizers, preserving patient data, including text and barcodes, for longer wristband usability.
- Ability to simultaneously print patient chart labels and the wristband on one sheet, streamlining patient admissions.
- Available with hole-punches for securement into patient charts.
- Adhesive-free zones around form edges and holes prevent printer jams and reduce costly printer maintenance.
- Enables quick deployment of a barcoded wristband solution without the need for a separate printer for wristbands.

LaserBand2 Advanced Wristbands

Zebra's self-laminating LaserBand2® Advanced wristbands feature an advanced shape and design that make assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning, while providing superior patient comfort.

Zebra's self-laminating direct-print laser wristbands allow printing wristbands and labels on one sheet utilizing existing laser printers.

- Self-laminating seal protects the wristband from moisture and hand sanitizers, preserving patient data, including text and barcodes for longer wristband usability.
- Ability to simultaneously print patient chart labels and the wristband on one sheet streamlines patient admissions.
- Available with hole punches for securement into patient charts.
- Adhesive-free zones around form edges and holes prevent printer jams and reduce costly printer maintenance.
- Enable quick deployment of a barcoded wristband solution without the need for a separate printer for wristbands.

Features Include

- Self-laminating design protects printed text and barcodes
- Tamper-evident, adhesive closure
- Wristband extender to fit a wide range of wrist sizes
- Available in adult, pediatric and infant sizes, as well as a labor and delivery format
- Latex-free

LaserBand2 Advanced Wristbands Specifications

LaserBand2 Advanced wristbands are available in a wide offering of configurations to fit the patient identification needs of virtually all hospitals.

Infant Comfort Solutions

Wristbanding infants is a sensitive issue. While hospitals go to great lengths to properly identify infants, staff members are also concerned with the comfort and durability of the wristbands. Zebra kept these challenges in mind when creating a complete line of infant comfort solutions.

ComfyCuff

This soft foam cuff features an adjustable Velcro® closure, ensuring infant comfort. It can be used in conjunction with LaserBand2 Advanced pediatric / infant ID tags.

5" x 1.25", Latex Free, Part Number: LB2-BABY-P

ComfyCuff Security Seal

This security label is designed to securely stick to the ComfyCuff material and self-destruct to indicate wristband tampering.

2.875" x 0.4375", Latex-free, Part Number: LB2-BABY-CCS

Clip-closure

Self-locking

ComfyCuff Infant Swaddle Band

This soft Tyvek® band makes identifying a swaddled baby quick and easy. The Swaddle Band creates an extension between the ComfyCuff and LaserBand2 and LaserBand2 Advanced infant ID tags for easy tag access.

9" long, Latex Free, Part Number: LB2-BABY-SWB9

Vinyl Infant Wristband

These latex-free, soft, flexible vinyl wristbands are for use with LaserBand2 Advanced infant ID tags. The narrow width allows some models of "Abduction Prevention Systems" to be attached. They are available with a clip or self-locking closure. The self-locking closure wristband enables size adjustment with a gentle tug as the infant loses mass around the wrists and ankles within the first 24 hours of birth.

Clip-Closure Part Number: PS-BABY

Self-Locking Closure Part Number: PS-INFANT-ADJ

Alert Wristbands and Labels

Enable quick identification of special patient conditions with color-coded wristbands and labels from Zebra. Our solutions enable compliance with state, regional and local color-coding standards for patient conditions such as allergy, DNR, fall risk, latex allergy and restricted limb.

Spot-alert labels

Spot-alert color-coded labels can adhere to any wristband and feature a strong adhesive that causes the label to tear if tampering occurs. They are available in standard color and designation combinations to support the most critical patient conditions.

Slim alert wristbands

These color-coded vinyl clip-closure wristbands are 0.625 inch by 10 inches and are pre-printed with patient conditions.

Tyvek alert wristbands

These color-coded Tyvek adhesive closure wristbands are 1 inch by 10 inches and are pre-printed with patient conditions.

OmniBand

Healthcare providers currently printing barcode labels can quickly implement barcode wristbands by placing a laser or thermal barcode label in Zebra's self-laminating OmniBand® wristband—without the need for IT support.

Features Include:

- Self-laminating design that protects printed text and barcodes
- Tamper-evident adhesive closure
- Wristband extender to fit a wide range of wrist sizes
- Accepts labels up to 3.25" x 1"
- Available in adult and pediatric sizes
- Latex-free
- Two wristbands per sheet

Ideal for specialized use in hospitals such as:

- Rehabilitation hospitals
- Psychiatric wards and hospitals
- Long-term care hospitals
