

Elevate Patient Care With Clinical Mobility Solutions

Healthcare staff are always on the go and mobile communication is essential. Zebra's enterprise communication solutions provide instant, secure connectivity, keeping your entire care team informed and focused on patient care.

1 Staff securely access their assigned mobile computer and user profile at the start of their shift.

2 Nurses complete tasks at the point of care, documenting in real time on mobile computers or desktop displays using Workstation Connect.

3 Mobile clinicians call care team members or alert staff of priority situations with the touch of a button using Zebra Workcloud Software.

4 IT staff remotely monitor device usage and manage uptime requirements.

Communicate Instantly

Easily talk, text and share images between care teams for instant and secure collaboration.

Get Test Results Faster

Access test results on mobile devices for improved response time.

Help Reduce Medication Errors

Increase compliance rates for barcode medication administration (BCMA).

Automate Critical Alerts

Send automatic critical alerts to nurses' mobile devices for better responsiveness.

Streamline Workflows

Optimize workflows to allow more time for direct patient care and interaction.

Track Devices In Real Time

Monitor and manage devices with Zebra Device Tracker to help ensure availability and uptime.

Empower care teams with integrated tools and data to streamline workflows and enhance patient outcomes.
