

Z-Perform™ 1000D 60 Receipt

Direct thermal smooth uncoated receipt paper

Z-Perform 1000D 60 Receipt delivers high-quality results at an economical price point. This direct thermal bright white uncoated receipt paper is designed to last — with high-quality images and text that ensure your receipts will remain readable and intact for their entire life. With the lowest cost per square metre among Zebra's mobile receipt solutions, Z-Perform 1000D 60 Receipt is ideal for a wide range of applications.

Consistently exceptional performance with Zebra Certified Supplies

Our material sciences experts have pre-tested, selected and certified the highest-performing receipt papers to meet your application's durability, image quality and archival requirements, as well as your budget. We perform extensive testing for print quality and printer wear and tear. And Zebra is ISO 9001 certified. We adhere to consistent processes and never swap out materials. No matter when you order your receipt paper, you can count on the same great performance.

Archivable up to ten years

Z-Perform 1000D 60 Receipt offers high resistance to image fading. When printed to its optimum image density and when handled and stored correctly, printed images will remain legible for 10 years (refer to Archive Conditions in specifications).

Customise your receipts

Want customisation? You've got it. We can pre-print your company logo, instructions, return information, terms and conditions, watermarks and more. By pre-printing standard fields, you can reduce printer workload and extend the battery life of your mobile printers.

Minimise receipt paper roll changes during a shift

With Z-Perform 1000D 60 Receipt, you get maximum meterage per roll. That means fewer roll changes during a shift for maximum productivity.

Zebra ZipShip — on the shelf and ready to ship

Need your receipt paper in a hurry? Z-Perform 1000D 60 Receipt is part of our Zebra ZipShip program — on the shelf and ready for immediate dispatch. You get fast shipment and the minimum order is just one box.

Z-Perform 1000D 60 Receipt — high quality printing at an economical price point.

Product Performance and Suitability	
Recommended storage conditions (before use)	6 months duration when stored at 18°C to 25°C at 40% to 60% RH
Expected life span in application ²	Indoor use, up to 1 year Indoor archive use, up to 5 years

Archive Conditions

Zebra expects but does not warrant that printed image durability on this product will last for 10 years, when stored according to specific archive conditions.

When printed, the product should be archived at temperatures between 18°C and 24°C, with a relative humidity of 40% to 60%. Longer term storage at temperatures over 40°C or over 60% relative humidity can lead to a reduction in contrast.

The product should be archived in the dark, avoiding direct sunlight, fluorescent and similar UV light sources.

This product should not come into contact with any of the following products, as they can have a negative effect on the contrast of the printed image and cause image fading:

- Carbon and carbonless forms
- Chart papers or adhesive containing tributyl phosphates, dibutyl phosphates or other organic solvents
- Envelopes and folders composed of plastics containing plasticisers, such as those commonly available from office materials suppliers (alternatives are available)
- Solvents, including alcohol
- Discolouring materials such as polyvinylchloride films containing plasticisers

Regulatory and Compliance

BPA free

Material Testing in End Application

The information contained in this document is to be used for guidance only and is not intended for use in setting specifications. All purchasers of Zebra products shall be solely responsible for independently determining if the product conforms to all requirements of their unique application.

For testing of this material for kiosk applications, please order SAMPLE33622-K. For all mobile printers, please order from the ZipShip price list or contact your supplies specialist representative.

Footnotes

1. Media will withstand this temperature range.
2. Following correct application and appropriate dwell time (usually 24 hrs) we expect, but do not warrant, a life span as indicated

Ideal for these applications

Government

- Electronic citations for law enforcement
- Parking fines

Logistics

- Delivery receipts for mobile applications

Warehousing

- Packing lists

Retail

- Mobile point-of-sale and coupon printing

Transportation

- Airline boarding passes

Other

- Mobile invoice and receipt printing
